General Cleaning Recommendation:

In general, most common stains can be cleaned using warm, soapy water and clear water rinses. Moderate scrubbing with a medium bristle brush will help loosen soiling materials from the depressions of embossed surfaces. For more stubborn stains, use Formula 409 commercially available mild detergent in accordance with the manufacturer's instructions.

Full strength rubbing alcohol or mineral spirits** may be tried cautiously as a last resort on very stubborn stains, if the above suggestions do not work. Indiscriminate use of any solvent or solvent containing cleaner, can severely damage or discolor vinyl.

NOTE: Detergent should never be used on a regular or repeated basis for normal cleaning... repeated rinsing with clear water after any cleaning procedure.

When disinfecting with bleach, dilute with water up to a 4:1 ratio (20%). Liberally apply diluted disinfectant using a sponge. Rinse with cold water several times. Wipe dry and repeat if necessary. Federal regulations require that guidelines on the bleach label need to be followed for antiseptic or antimicrobial purposes.

Arc-Com cannot be responsible when unknown changes are made by the manufacturer of the cleaner to their formulations.

**Caution: Exercise care as these solvents are flammable. Use only small quantities of solvents and keep clear of any sources of ignition. Wear protective gloves and ensure cleaning takes place in a well-ventilated area.
